01 Getting in

1. Open **app.musingswithdeva.com** in Chrome, or tap the app icon if you've installed it.
2. Enter your **User ID** and **password**, then tap **Sign In**.
3. You stay signed in — you only log in once on each device.

Install it like an app

Chrome menu **:** → **Add to Home screen**. It then opens full-screen from your home screen, like WhatsApp. On iPhone: **Share** → **Add to Home Screen** — this is required for notifications to work.

Turn on notifications — once per device

Menu → **Settings** → **Notifications** → **Turn on notifications** → Allow. Underneath, choose your **class reminder**: how long before each class you want a buzz — 15 minutes, 30 minutes, 1 hour, or your own

time up to 24 hours.

02 The five screens

SCREEN	WHAT IT'S FOR
Dashboard	Today at a glance, and anything waiting for your approval
Students	All students and admins; deactivating people
Classes	The full list — upcoming, completed, cancelled
Schedule	The calendar — book classes and block your time
Fees	Confirm payments and record cash

On a phone, tap  at the top-left to move between screens. The  **bell** at the top-right holds your notifications.

03 Dashboard — start here each day

Four boxes across the top: **Total Students**, **Today's Classes**, **Pending Requests** and **This Month**. Tap any of them to jump to that screen.

Needs Confirmation appears only when something is waiting for you — a student has booked a slot that clashes with another class, or has asked to move a class. Each row gives the student's name and time with **Confirm** or **Reject**. Below that, **Today's Classes** lists your day in order.

04 Schedule & blocking time

Switch between **Month**, **Week** and **Day** at the top; **Today** brings you back to today.

Book a class yourself

1. Tap **+ Schedule Class** — or tap an empty slot on the calendar, then tap it again.
2. Choose the **student**, **date**, **time** and **duration** (30m, 45m, 1h, 1½h, 2h).
3. Add **lesson notes** if you want — what you plan to cover.
4. For a regular student, tick **Make this a recurring class**, choose every week or every two weeks, and optionally an end date. Leave the end date blank and it creates eight classes.

5. Tap **Schedule Class**.

The app will warn you — but never stop you — if the slot already has a class (fine for a group lesson), or if you've marked yourself unavailable at that time.

Block your time off

Menu → **Schedule** → **Availability**.

1. Pick the **From** date — and a **To** date if it runs over several days.
2. Tick **Block full day(s)**, or leave it unticked and set start and end times, such as 9:00 to 17:00.
3. Add a **reason** if you like — it stays private, students never see it.
4. Tap **Block this time**.

Students cannot book any time you've blocked.

IF CLASSES ARE ALREADY BOOKED IN THAT PERIOD

You'll see them listed first — every student, date and time — before anything changes. Then choose:

Keep classes — nothing happens, go back and pick a different time.

Block & cancel — the time is blocked, those classes are cancelled, and each student is told: *"Your class has been cancelled — Guruji is unavailable. Please reschedule after consulting with Guruji."*

If your plans change — restoring cancelled classes

Say the concert is called off. Go back to **Availability** and tap the 🗑️ beside that blocked period. If it had cancelled any classes, you'll be asked what to do:

Unblock & restore classes — the time is free again *and* those classes come back, with each student told *"Guruji is available again — your class is back on."*

Unblock only — frees your time but leaves those classes cancelled.

Keep block — changed your mind; nothing happens.

Only classes still in the future can be restored.

05 Classes & recordings

The **Classes** screen has three tabs: **Upcoming**, **Completed** and **Cancelled / Rejected**. Tap any class to open it.

BUTTON	WHAT IT DOES
Confirm / Reject	For booking requests waiting on you
Mark as Done	Marks the class completed
Add / Edit Notes	What was covered — the student can read this
Add Recording Link	On completed classes only
Reschedule	Pick a new date and time; the student is told
Cancel Class	Cancels it; the student is told
Delete permanently	Removes it completely — cannot be undone

Posting a class recording

1. Go to **Classes** → **Completed** tab and tap the class.
2. Tap **Add Recording Link**.
3. Paste the link — YouTube, Google Drive or Zoom.
4. Give it a title if you'd like, such as *Raag Yaman — meend practice*.
5. Any tips or corrections go in **Lesson Notes**.
6. Tap **Save Recording**.

The student is notified and finds it under their **Recordings** menu, alongside the date and time of that class. Posting a recording is entirely optional — skip it whenever you like.

06 Students

Three tabs: **Students**, **Deactivated** and **Admins**. Search by name, User ID or country, and sort by name, country or date joined. Tap anyone to see their full history — classes, payments and recurring schedules.

- **Deactivate** — they can no longer log in and their upcoming classes are cancelled. Their history is kept, and you can bring them back any time.
- In the **Deactivated** tab, **Reactivate** restores them, or **Delete** removes them and all their data for good.
- In the **Admins** tab, **+ Add Admin** creates an assistant account — enter a name, User ID and password, then pass those to them.

ADDING A NEW STUDENT

New students are added from an **admin** account, not the teacher account. Ask one of your admins to add them.

07 Fees

Choose the **month** at the top, then filter by status.

- A student has submitted a payment → tap **Confirm**, or **Decline** if something's wrong. They're told either way.
- Paid in cash or by hand → **Mark Paid**, which records it as confirmed straight away.
- If they uploaded a screenshot, tap to view the receipt.

Students never see fee amounts or who owes what — only their own payments, and whether each is pending or confirmed.

08 What happens on its own

- **Past classes complete themselves.** Once a class's finishing time passes, it moves to Completed on its own — you don't have to mark every class done. If a class didn't actually happen, open it and delete it.
- **Free slots confirm themselves.** When a student books an empty slot it's confirmed instantly. Only bookings that clash with another class come to you.
- **One shared calendar.** You and your admins see the same schedule — anything they book or block appears for you, and the other way round.
- **Times are personal.** Each student sees class times in their own country's time; you always see yours.

09 Your notifications

WHEN	WHAT YOU'LL SEE
A student books	<i>Ankoo booked a class — Mon, 11 Aug, 06:00 PM.</i>
A booking clashes	<i>Ankoo booked Mon, 11 Aug, 06:00 PM — this overlaps another class, please confirm.</i>
A reschedule request	<i>Ankoo asked to reschedule to Tue, 12 Aug, 07:00 PM.</i>
A student cancels	<i>Ankoo cancelled their class — Mon, 11 Aug, 06:00 PM.</i>
A payment arrives	<i>Ankoo submitted a payment of ₹2000 for review.</i>
Before each class	<i>Your class starts at 06:00 PM — in about 15 minutes.</i>

Tapping a notification opens the right screen straight away. They reach your phone even when the app is closed, as long as you've turned them on in Settings.

10 If something looks wrong

PROBLEM	WHAT TO TRY
Blank or stuck screen	Close the app fully and open it again.
No notifications arriving	Settings → Notifications. If the button says <i>Turn on</i> , tap it. On iPhone, open the app from the Home Screen icon, not Safari.
"Notifications are blocked"	Allow notifications for the app in your phone's own settings, then try again.
A class has disappeared	Look in the Completed tab — its time has probably passed.
A student can't log in	Check they aren't in the Deactivated tab. Passwords are case-sensitive.

Times look wrong

Settings → Studio Timezone — make sure it's your city.

11 What cannot be undone

TAKE A MOMENT BEFORE THESE

- **Delete permanently** on a class.
- **Delete** a deactivated student — this removes all their classes and payment history.
- **Cancel Class** — a cancelled class cannot be un-cancelled. The one exception is a class cancelled by a block, which comes back if you remove that block.

Everything else is safe to explore. Tap around freely.
