1. Welcome & the three roles

Deva's Classes is the online home for Debapriya Adhikary's music studio. It lets students book and manage their classes and pay fees, while the teacher and admins run the schedule, students and payments — all in one place, on phone or computer.

There are three kinds of accounts:

Role	What they can do
Student	Book, reschedule and cancel their own classes; submit fee payments; see their history.
Teacher	Everything: run the schedule, manage students, confirm bookings & payments, and create Admins. This is the main studio account.
Admin	All the same management features as the Teacher (schedule, students, fees). Admins are created by the Teacher.

Note — *Students never sign up by themselves — the Teacher or an Admin creates each student's login.*

2. Getting started

Opening the app

Open the studio link in any browser (Chrome recommended) on your phone or computer. You can **install it like an app**: in Chrome, tap the browser menu (the three-dots icon) and choose **"Add to Home screen"** / **"Install app"**. It then opens full-screen like a normal app.

Logging in

- 1 Enter the **email** and **password** you were given.
- 2 Tap **Log in**. You'll land on your dashboard.

Note — *Forgot your password? There is no in-app reset — contact the Teacher/Admin and they will reset it for you.*

Light & dark mode

Use the theme toggle to switch between a bright look and the dark blue night look. Your choice is remembered.

Automatic updates

The app updates itself — when a new version is released it refreshes on its own the next time you open it. You don't need to clear anything.

3. Student guide

Your classes (the dashboard)

“My Classes” shows your lessons under three tabs:

- **Upcoming** — confirmed classes plus any requests awaiting the teacher.
- **Completed** — finished classes.
- **Cancelled** — cancelled or declined classes.

Note — All times are shown in **your own timezone**. If you study from abroad, you can also see the teacher's time while booking.

Booking a class

- 1 Tap **Book a Class**.
- 2 In **Month** view, tap the date you want — it opens that day.
- 3 In **Day** view, tap a free time slot once to highlight it, then tap again (or **Book this slot**) to open the form. You can also tap the **Book Class** button to pick the date and time by hand.
- 4 Choose the **duration** (30 / 45 / 60 / 90 min) and add a short **note** for the teacher if you like.
- 5 Check the time, then tap **Book Class**.

The colour legend on the calendar:

Tag	Meaning
Upcoming	Your own booked class.
Busy	That time is already taken — you can still request it.
Done	A completed class.

What happens after you book

- If the slot is **free** → your class is **booked & confirmed** instantly.
- If it **overlaps** another class → a **request is sent** and the teacher confirms it. You'll get a notification.

Note — Studying from a different country? Use the **My time / Teacher's time** toggle — the booking screen shows both times so you pick a slot that suits you both.

Rescheduling a class

On an upcoming class, tap **Reschedule**, pick a new date & time, and send the request. The class shows “**Awaiting confirmation**” until the teacher approves the new time.

Cancelling a class

Tap **Cancel** and confirm. The class is cancelled **immediately** and the teacher is automatically notified. (For a request that isn't confirmed yet, this simply withdraws it.)

Marking a class done

After a lesson you can tap **Mark Done** to move it to your Completed list.

Paying fees

Open **Fees** to see each month's status — **Paid**, **Pending confirmation**, or **Unpaid**.

- 1 Tap **Submit Payment**.

- 2 Enter the **amount** and choose the **method**: UPI, Bank transfer, or Cash.
- 3 Select the **month(s)** you're paying for (you can select several at once).
- 4 For UPI / bank transfer, **upload a screenshot** of the receipt. (Cash needs no upload.)
- 5 Tap **Submit**. The payment shows **Pending** until the teacher/admin confirms it.

Note — *If a payment is declined, you'll be asked to submit it again.*

Notifications

The bell icon shows updates — class confirmations, reschedule results and payment confirmations. Tap one to view it; you can clear them when done.

4. Teacher & Admin guide

Teacher and Admin screens are the same. The only difference: the **Teacher** can create **Admins**.

Dashboard

Four cards at the top — tap any to drill in:

- **Total Students** → opens the student list.
- **Today's Classes** → opens the schedule.
- **Pending Requests** → bookings waiting for you.
- **This Month** → opens a **list of the month's classes** (grouped by day).

Below the cards: **Today's Classes** and a **Needs Confirmation** section where you **Confirm** or **Reject** student booking/reschedule requests in one tap.

Schedule

Switch between **Month**, **Week** and **Day** views. **Today** jumps back to now.

- 1 **Create a class**: choose the student, date & time, duration, optional recurring schedule, and notes.
- 2 **Two-click booking**: tap a slot to highlight, tap again to open the form.
- 3 **Open any class** to see its details and act on it.

From a class's detail screen you can **Mark as Done**, **Reschedule**, add/edit **Lesson Notes**, **Cancel**, or **Delete**. Each important action asks “**Are you sure?**” first to avoid mistakes. Pending requests show **Confirm / Reject** buttons.

Note — *When you reschedule, cancel or book, the student is notified automatically — no approval needed from them.*

Students (Users)

- See **Active**, **Deactivated** and **Admins**. Search and sort the list.
- **Tap anywhere on a student's row** to open their profile.
- **Add Student** creates their login (share the email & password with them).
- **Deactivate / Reactivate** to pause or restore access (reversible).
- **Delete** permanently removes a student and their data — it asks you to confirm first.
- **Teacher only: Add Admin** to give someone full management access.

Student profile

Shows the student's details and quick stats (upcoming, completed, payments). From here you can **record a payment** for them and **confirm or decline** payments they've submitted.

Fees

Pick a month to see every student's status with a **Paid / Pending / Unpaid** summary.

- **Confirm** or **Decline** a student's submitted payment — tap **Receipt** to view their uploaded proof.
- **Mark Paid** records a payment yourself (e.g. cash in person): enter amount, method and month(s). It's confirmed **instantly**. Cash needs no receipt; for UPI/bank you may attach one.
- Use the month buttons to go back to earlier months as needed.

Notifications

You're alerted about new bookings, reschedule requests, **student cancellations** and submitted payments. Tap to open; clear individually or all at once.

5. How booking works (at a glance)

Who acts	Action	Result
Student	Books a free slot	Confirmed instantly
Student	Books a taken slot	Request → staff confirms
Student	Reschedules a class	Request → staff confirms
Student	Cancels a class	Cancelled at once → staff notified
Teacher / Admin	Books, reschedules or cancels	Happens at once → student notified

6. How payments work (at a glance)

Who acts	Action	Result
Student	Submits a payment (+ receipt)	Status Pending
Teacher / Admin	Confirms it	Status Paid
Teacher / Admin	Declines it	Student re-submits
Teacher / Admin	Mark Paid (records directly)	Paid instantly

Note — Cash payments don't need a receipt upload. Receipts that are uploaded can be viewed by the teacher/admin.

7. Tips, FAQ & troubleshooting

Frequently asked

How do I get an account?

The Teacher or an Admin creates it and shares your email & password.

I forgot my password.

Contact the Teacher/Admin — they reset it for you.

Why are the times different from a classmate's?

Everyone sees times in their own timezone. Use the My time / Teacher's time toggle while booking.

There's a faint line across today on the calendar.

That's just the 'current time' marker — it shows where 'now' is. Not a class.

I changed my timezone but still see the old one.

Switch away from the app and back — it refreshes your profile automatically.

The app looks out of date.

Close and reopen it; it auto-updates to the latest version.

Good to know

- Works on phone and computer; install it to your home screen for an app-like experience.
- Your booking and payment actions save even on a slow connection.
- Important actions (cancel, delete, mark done) always ask for confirmation first.

Deva's Classes — thank you for being part of the studio.
